DCID 1/16 ISSUES
20 Nov 87

- ** SCOPE. (change scope to SCI-only versus all WNINTEL information)
[DIA, USA, USAF, OSD#]
 - CIA/DDO information is NOT SCI.
 - ** MULTILEVEL MODE. (should not allow multilevel mode of operation
for systems processing SCI.) [NSA*]
 - NSA Reg 10-27 and DCI SAFEGUARDS both allow MLS.
 - ** DELEGATION OF ACCREDITATION AUTHORITY. (further delegation authority
for accrediting systems is needed.) [CIA, DIA, USAF say yes]
[CIA feels the reaccreditation authority should be delegated
further than initial accreditation authority.]
[NSA says the delegation authority is too loose now]
 - ** DIRECT vs. INDIRECT USERS. (should not include indirect users in
determining mode of operation.) [DIA, USA, USAF]
 - Major decision for determining mode of operation.
 - Who's at the end of an electronic linkage?
 - ** PHASED IMPLEMENTATION OF REQUIREMENTS. (time schedule still too
stringent.) [DIA, USA, USAF, C3I]
 - Within 3 years, accredit all current systems, based on new DCID.
 - Within 5 years, provide environmental and technical safeguards
per DCID
 - As a goal by FY2000, fully implement replacement with trusted
systems
 - DIA suggests priority on SCI systems
 - ** RESOURCES. (impact on resources is expected to be severe.)
[DIA, USA, USAF, OSD]
-
- # The OSD response does not appear to include input from tactical
intelligence of C3I.
- * The SCI-forum NSA response was reported by the NSA forum member as
not having been coordinated within NSA.
